#### INDEX TO VOLUME 3

	D	. The state of the	_
A	Page		Page
d alugae calaium ablacida compounda of	1041	Breckinridge, F. Chapin, and J. A. Nolan,	
a-d-gluose, calcium chloride compounds of	1041 1041	Relative visibility of luminous flashes	
optical rotation of x-methyl-d-guloside, optical rotation of	1041	from neon lamps and from incandescent	11
A gavimetric method for the determination of	1011	lamps with and without red filters	11 507
ruthenium	993	Brick, absorption of tests of Brick walls, compressive tests of te	507
A study of purified wood fibers as a paper-		Brick walls, compressive tests of	507
making material	469	Bricks, fire-clay, investigation of	691
making material	445	Bricks, fire-clay, investigation of Bright, H. A., and C. P. Larrabee, Determina-	001
A Derration of lenses	391	tion of manganese in steel and iron by	
Absorption properties of clay bricks	105	the persulphate arsenite method	573
Absorption requirements of clay brick	105	Bromine oxidation of aldoses in the presence	
Absorption tests of clay bricks	507	of buffers	57
Acid, aldonic, preparation of	57	Bron and beryllum, separation of, from	
bionic, preparation ofAircraft beacon, course shift indicator for	57 1	aluminum  Brooks, Donald B., Correcting engine tests for humidity	91
Aircraft Deacon, course shift indicator for	1	Brooks, Donald B., Correcting engine tests	-0-
Aircraft, double-modulation beacon for guiding	1	for humidity  Buckley, John P., S. Epstein and, Metallographic polishing. I. Automatic metallographic polishing.	795
instruments, double resonant circuit visual	-	graphic poliching I Automatic met-	
course indicator for	1	allographic polishing machine	783
flying of	î l	Building materials, absorption of	105
flying ofnavigation of, by radiovisual radio reception, on, by double-reso-	1	Building papers	75
visual radio reception, on, by double-reso-		Building papers Bunsen flames	65
nant circuit type course indicator	1		
Airports, means of location of, by radio	1	C	
radiobeacon apparatus forAirway beacon, test of neon lamp for	1	•	
Airway beacon, test of neon lamp for	11	Calcium chloride, compounds of, with d-	
Airways, application of radio-direction bea-	_		459
con to method of guiding aircraft on, by use of double resonant circuit type radio-	1	mannoseCaesium, photoionization of	303
method of guiding aircraft on, by use of		Calibration, double-modulation type radio-	000
		beacon	1
beacon course indicator	303	beacon Carson, F. T., and F. V. Worthington, A	
Aluminum, separation from beryllum	91	study of sheathing papersCast-iron corrosion underground	75
separation from phosphorus	91	Cast-iron corrosion underground	275
separation from tantalum, columbium, ti-	0.1	Ceramic bodies, effect of water on expansions	
tanium, molybdenum, arsenic, fluorine,		of Circles, parallel, the mutual inductance of	331
and boron	91	Circles, parallel, the mutual inductance of	
and boronseparation from uranium	91	two	255
separation from vanadium	91	Classification of clays and shales.	105
separation of by use of 8-hydroyquinoline.	91	Clay brick walls, compressive tests of	507 105
Analysis, diaphragm system for the X-ray		Clay products, absorption of Clays, absorption properties of	105
standard ionization chamber	807	Clays used in the preparation of fire-clay	100
fluorine and silica, in glasses and enamels_	581	hrieks	691
manganese in iron and steel	573	Cleaning, dry, fastness of dyes to— Coblentz, W. W., and R. Stair, Data on ultra- violet solar radiation and the solariza- tion of window materials—	39
platinum metals, determination of ruthe-	993	Coblentz, W. W., and R. Stair, Data on ultra-	
Appel, William D., and Robert F. Reed, Light	000	violet solar radiation and the solariza-	
fastness of lithographic ink pigments	359	tion of window materials	629
Arc spectrum of arsenic	765	Cons, inductance, calculation	163
Arsenic, are spectrum of	765	Columbium, separation of, from aluminum	91
concretion of from aluminum	91	Comparative properties of wrought iron	
Artificial aging of paper Automatic polishing machine	469	made by hand puddling and by the	0.50
Automatic polishing machine	783	Aston processCompression strength of clay brick walls	953 507
		Compressive tests, clay brick walls	507
В		alov brieks	507
	- 1	Cooling curves, surface and center, for	00.
3-methyl-d-guloside, optical rotation of	1041	quenching steels	399
Barium benzoate, use of, as a buffer in the		Cooling curves, surface and center, for quenching steels	399
Barium benzoate, use of, as a buffer in the oxidation of aldoses by bromine water.	57	Copper-silver entectic point, thermoelectric	
Beacon, aircraft radio direction	1	temperature scales	343
course shift indicator for	1	Copper valley flashings, corrosion of	937
double-modulation type	1	Correcting engine tests for humidity	795
neon and incandescent lamps, test of	11	Corrosion, copper valley flashings	937
Beij, K. Hilding, Corrosion of open-valley	00=	open-valley flashings	937
flashes	937	underground, cast-iron	275 1
Bennett, A. H., Representation of aberration		Course, double-modulationdouble resonant type visual indicator for	1
diffraction effects by means of rotating sectors	391	instrument for indicating a shift in	1
Bicking, George B., Merle B. Shaw and, Fur-	001	radio direction, for aircraft	î
ther experimental production of cur-		Cross, H. C., E. C. Groesbeck, I. J. Wumore.	
rency paper in the Bureau of Standards	1	radio direction, for aircraft	
paper mill	899	Iron-nitrogen system	1005
Boeckner, C., F. L. Mohler and, Photoioniza-		Curing conditions, effect of, on brick wall	
tion of some alkali vapors	303	strength	507
Bodies, sagger, preparation of experimental	419	Currency paper, experimental production of_	899

### BUREAU OF STANDARDS JOURNAL OF RESEARCH

#### CONTENTS OF RECENT NUMBERS-Continued

#### September, 1929 (Vol. 3, No. 3)

- RP99. Thermoelectric temperature scales. William F. Roeser. Price 5 cents.
- RP100. Light fastness of lithographic ink pigments. William D. Appel and Robert F. Reed.
  Price 10 cents.
- RP101. Effect of oxidizing conditions on accelerated electrolytic corrosion tests. Henry S. Rawdon and W. A. Tucker. Price 10 cents.
- RP102. Representation of aberration diffraction effects by means of rotating sectors. A. H. Bennett, Price 10 cents.
- RP103. Hot aqueous solutions for the quenching of steels. H. J. French and T. E. Hamill.

  Price 15 cents.
- RP104. Preparation of experimental sagger bodies according to fundamental properties. R. A. Heindl and L. E. Mong. Price 10 cents.
- RP105. A suppressed-zero electrodynamic voltmeter. F. K. Harris. Price 5 cents.
- RP106. Two isomeric crystalline compounds of d-mannose with calcium chloride. J. K. Dale. Price 5 cents.
- RP107. A study of purified wood fibers as a paper-making material. Royal H. Rasch. Price 15 cents.

#### October, 1929 (Vol. 3, No. 4)

- RP108. Compressive strength of clay brick walls. A. H. Stang, D. E. Parsons, and J. W. McBurney.
- RP109. Determination of manganese in steel and iron by the persulphate-arsenite method. H. A. Bright and C. P. Larrabee.
- RP110. Determination of fluorine and of silica in glasses and enamels containing fluorine.

  J. I. Hoffman and G. E. F. Lundell.
- RP111. The heat of formation of sulphur dioxide. J. R. Eckman and Frederick D. Rossini.

#### November, 1929 (Vol. 3, No. 5)

- RP112. Optical heterogeneity of a fused quartz disk. L. W. Tilton and A. Q. Tool.
- RP113. Data on ultra-violet solar radiation and the solarization of window materials. W. W. Coblentz and R. Stair.
- RP114. Progress report on investigation of fire-clay bricks and the clays used in their preparation. R. A. Heindl and W. L. Pendergast.
- RP115. The first spectrum of xenon. William F. Meggers, T. L. de Bruin, and C. J. Humphreys.
- RP116. The arc spectrum of arsenic. William F. Meggers and T. L. de Bruin.
- RP117. Metallographic polishing. I. Automatic metallographic polishing machine. S. Epstein and John P. Buckley.
- RP118. Correcting engine tests for humidity. Donald B. Brooks.
- RP119. Analysis of Diaphragm system for the X-ray standard ionization chamber. Lauriston S. Taylor.

Research papers are available as separates for purchase from the Superintendent of Documents
United States Government Printing Office, Washington, D. C.

# BUREAU OF STANDARDS JOURNAL OF RESEARCH

PUBLISHED AT WASHINGTON, D. C.

With the July issue, the Journal begins its second year and third volume. The Journal contains the bureau's research papers and critical reviews in the fields of science and technology. These will be comparable in interest and importance with the bureau papers already issued.

© Several hundred researches are always in progress at the Bureau of Standards and the outlet for the results is the "Bureau of Standards Journal of Research."

(If you are interested in following the latest developments in science and technology you need the Bureau of Standards Journal of Research. If you are a subscriber, renew your subscription promptly; if not, your subscription will be appreciated. Copies are limited and it is not always possible to supply back numbers.

#### PRICES

Research papers (printed separately with durable paper cover and priced according to cost) see list of research papers on cover pages 2 and 3 of this issue.

> Address orders only to Superintendent of Documents Government Printing Office Washington, D. C.

The value of prompt and adequate news of the latest research results can not be measured by ordinary standards. They are permanent gainful assets for the expert. He can hardly afford to be without such basic sources
